Publishing Companion translates

WordPerfect

to

TEX

It doesn’t take a TeXpert to use TeX.

With Publishing Companion, you can publish documents using TeX with little or no TeX knowledge. Your WordPerfect files are translated into TeX files, so anyone using this simple word processor can immediately begin typesetting their own documents!

And now, Publishing Companion translates WordPerfect 5.0 and 5.1 files into TeX.

Retail Price ................................................................. $249.00

Academic Discount Price ................................................ $199.00

For the power of TeX with the ease of a word processor, Publishing Companion is your “best friend” for desktop publishing.

ARBORTEXT INC.
Updated \TeX \text{ Products} from the American Mathematical Society

\AMS-\TeX \text{ Version 2.0}

\AMS-\TeX, the \TeX \ macro package that simplifies the typesetting of complex mathematics, has been updated to version 2.0. \AMS-\TeX \text{ is intended to be used in conjunction with AMSFonts 2.0 (see below). However, }\AMS-\TeX \text{ can also be used without AMSFonts. }\AMS-\TeX \text{ is available on IBM or Macintosh diskettes—either format may be uploaded to many mainframe computers. Prices: $32 list, $29 AMS member.}

\AMSFonts \text{ Version 2.0}

AMSFonts 2.0 are designed for use with either \AMS-\TeX \text{ 2.0 or Plain }\TeX. \AMSFonts \text{ 2.0 cannot be used with previous versions of }\AMS-\TeX\text{. Two distributions of fonts are available: one for use on PCs and mainframes (with any implementation of }\TeX\text{), the other for use on a Macintosh with }\TeX\text{. The fonts included on these distributions are:}

* 10 point is included in the standard \TeX \text{ distribution.}

** Developed by the University of Washington

\AMSFonts \text{ for use on a PC or mainframe}

- Font Resolution: 118, 180, 240, 300, 400 dpi (one resolution per order).
- Magnification: All the standard \TeX magnifications are included. The standard magnifications are: 100, 109.5, 120, 144, 172.8, 207.4, and 248.8%.
- Format: high-density 5.25" diskettes.
- Prices: $48 list, $43 AMS member.

\AMSFonts \text{ for use on a Macintosh with }\TeX\text{.}

- Font Resolution: 72, 144, and 300 dpi (all resolutions included in each order.)
- Magnification: The standard distribution includes fonts at 100% and 120%. An extended distribution, containing all the standard \TeX magsteps, is also available.
- Format: double-sided double-density 3.5" diskettes.

SHIPPING AND HANDLING CHARGE: $8 per order in the US and Canada, $15 elsewhere.

HOW TO ORDER: Prepayment is required. Send orders to: American Mathematical Society, P. O. Box 1571, Annex Station, Providence, RI 02901 or call the AMS at (401) 455-4000, or (800) 321-4AMS in the continental U.S. and Canada, or write to: \TeX Library, American Mathematical Society, P.O. Box 6248, Providence, RI 02940. Fax: (401) 455-4004 Telex: 797192. When ordering AMSFonts for the PC, specify desired resolution.
Public Domain \TeX

The public domain versions of \TeX{} software are available from \textit{Maria Code - Data Processing Services} by special arrangement with Stanford University and other contributing universities. The standard distribution tape contains the source of \TeX{} and \textsc{metafont}, the macro libraries for \textsc{ams-\TeX{}}, \textsc{imatex}, \textsc{slitex} and \textsc{hp \TeX{}}, sample device drivers for a Versetec and LN03 printers, documentation files, and many useful tools.

Since these are in the public domain, they may be used and copied without royalty concerns. A portion of your tape cost is used to support development at Stanford University.

Compiled versions of \TeX{} are available for DEC VAX/VMS, IBM CMS, IBM MVS and DEC TOPS systems. Systems using a standard format must compile \TeX{} with a Pascal compiler.

\TeX{} Order Form

\TeX{} Distribution tapes:

- Standard ASCII format
- Standard EBCDIC format
- Special VAX/VMS format Backup
- Special DEC 20/TOPS 20 Dumper format
- Special IBM VM/CMS format
- Special IBM MVS format

Font Library Tapes (GF files):

- 300 dpi VAX/VMS format
- 300 dpi generic format
- IBM 3820/3812 MVS format
- IBM 3800 CMS format
- IBM 4250 CMS format
- IBM 3820/3812 CMS format

Tape prices: $92.00 for first tape, $72.00 for each additional tape. Postage: allow 2 lbs. for each tape.

Documents:

FAX (614) 294-3704
Send us your \TeX{} DVI files and we will typeset your material at 2000 dpi on quality photographic paper — $2.50 per page!

Choose from these available fonts: Computer Modern, Bitstream Fontware™, and any METAFONT fonts. (For each METAFONT font used other than Computer Modern, $15 setup is charged. This ad was composed with PCT\TeX{}® and Bitstream Dutch (Times Roman) fonts, and printed on RC paper at 2000 dpi with the Chelgraph IBX typesetter.)

And the good news is: just $2.50 per page, $2.25 each for 100+ pages, $2.00 each for 500+ pages! Laser proofs $.50 per page. ($25 minimum on all jobs.)

Call or write today for complete information, sample prints, and our order form. TYPE 2000, 16 Madrona Avenue, Mill Valley, CA 94941. Phone 415/388-8873.
Do more and do it better with new PCTEX.

This all adds up to...

More power, greater performance, and increased memory capacity for the latest versions of popular macro packages like \LaTeX{} and \tt A_{\LaTeX}. And all three new PCTEX products feature the character sets and hyphenation tables to handle even the most complex European languages.

Order today. Call (415) 388-8853.
T2view  TEX from a new perspective

Interactive previewer for VMS DECwindows VAXstations to cost-effective X terminals
Familiar integration with FileView applications
Companion to our VMS TeX and T2 family

Accelerated design cycle
Precise confirmation of composition
Priced so you don't have to settle for less

Get a view of TeX
TurboTeX Release 3.0 software brings you the latest \TeX{} 3.0 and METAFONT 2.0 standards: preloaded plain \TeX{}, \LaTeX{}, \AmS-T\TeX{} and \AmS-\LaTeX{}, and plain METAFONT interfaced to CGA/EGA/VGA/Hercules graphics; TRIP and TRAP certification; Computer Modern and \LaTeX{} fonts, and printer drivers for HP LaserJet Plus/II/IIP, HP DeskJet, PostScript, and Epson LQ and FX dot-matrix printers. This wealth of software runs on your IBM PC (MS-DOS or OS/2), UNIX, or VAX/VMS system.

**Best-selling Value:** Turbo\TeX{} sets the standard for power and value among \TeX{} implementations: one price buys a complete, commercially-hardened typesetting system. *Computer* magazine recommended it as "the version of \TeX{} to have," *IEEE Software* called it "industrial strength," and thousands of satisfied users worldwide agree.

Turbo\TeX{} gets you started quickly, installing itself automatically under MS-DOS, and compiling itself automatically under UNIX. The 90-page User's Guide includes generous examples and a full index, and leads you step-by-step through installing and using \TeX{} and METAFONT.

**Power Features:** Turbo\TeX{} breaks the 640K memory barrier under MS-DOS on any IBM-compatible PC with our virtual memory sub-system. Even without expanded memory hardware, you'll have the same sized \TeX{} that runs on multi-megabyte mainframes, with plenty of memory for large documents, formatted \LaTeX{}, and demanding macro packages (like \PIC\TeX{} and \AmS-\LaTeX{} 2.0) that break other \TeX{} implementations. On larger computers, Turbo\TeX{} runs up to 3 times faster in less memory than the Stanford Pascal distribution.

**Source code:** Order the Turbo\TeX{} source in portable C, and you will receive more disks with over 85,000 lines of generously commented \TeX{}, Turbo\TeX{}, METAFONT, and printer driver source code, including: our WEB system in C; PASCAL; our proprietary Pascal-to-C translator; and preloading, virtual memory, and graphics code. Turbo\TeX{} meets C portability standards like ANSI and K&R, and is robustly portable to a growing family of operating systems.

**Availability & Requirements:** Turbo\TeX{} executables for IBM PC's include the User's Guide and require 640K and hard disk. Order source code (includes Programmer's Guide) for other machines. Source compiles with Microsoft C 5.0 or later on the PC; other systems need 1 MB memory and a C compiler supporting UNIX standard I/O. Media is 360K 5-1/4" PC floppy disks; other formats at extra cost.

**Upgrades:** If you have Turbo\TeX{} Release 2.0, you can upgrade the executables for only $40. If you have the source distribution, upgrade both executables and source for $80. Or, get either applicable upgrade free when you buy the AP-\TeX{} fonts (see facing page) for $200!

**No-risk trial offer:** Examine the documentation and run the PC Turbo\TeX{} for 10 days. If you are not satisfied, return it for a 100% refund or credit. (Offer applies to PC executables only.)

**Free Buyer's Guide:** Ask for the free, 70-page Buyer's Guide for more details on Turbo\TeX{} and dozens of \TeX{}-related products: previewers, \TeX{}-to-FAX and \TeX{}-to-Ventura/Pagemaker translators, optional fonts, graphics editors, public domain \TeX{} accessory software, books and reports.

**Ordering Turbo\TeX{}**

Ordering Turbo\TeX{} is easy and delivery is fast, by phone, FAX, or mail. Terms: Check with order (free media and ground shipping in US), VISA, Mastercard (free media, shipping extra); Net 30 to well-rated firms and public agencies (shipping and media extra). Discounts available for quantities or resale. International orders gladly expedited via Air or Express Mail.

TEX Users

Take Note....

Computer Composition Corporation offers the following services to those who are creating their technical files using TEX:

- Convert your DVI files to fully paginated typeset pages on our APS-5 phototypesetters at 1400 dpi resolution.
- Files can be submitted on magnetic tape or PC diskettes.
- Provide 300 dpi laser-printed page proofs which simulate the typeset page. (Optional service $1.50 per page)
- Macro writing and keyboarding from traditionally prepared manuscripts in several typeface families via the TEX processing system. Send us your manuscript for our review and quotation.
- Full keylining and camera work services, including halftones, line art, screens and full-page negatives or positives for your printer.
- Quick turnaround (usually less than 48 hours!) on customer supplied DVI files of 500 typeset pages or less.
- From DVI files: first 100 typeset pages at $4.75 per page; 100 pages and over at $3.50 per page. Lower prices for slower turnaround service.

For further information and / or a specific quotation, call or write Frank Frye or Tim Buckler

AP-\TeX\ Fonts

485 \TeX\ fonts identical to Adobe PostScript Fonts for $200

Get ready for the quality of Adobe PostScript fonts for your \TeX\ documents and non-PostScript printer! If you use any brand of \TeX\ with an HP LaserJet or DeskJet printer, the AP-\TeX\ fonts from Kinch add a wealth of attractive typefaces identical to the popular PostScript extended font families.

By de-crypting the Adobe coding, we are able to exactly translate the PostScript fonts into \TeX\ font bit map and metric files. These translated fonts include the renowned Adobe "hints," which render the smaller point sizes of the fonts with remarkable clarity on laser and ink-jet printers. The fonts use the \TeX\ character set encoding and font metrics, including full kerning and ligature programs.

The AP-\TeX\ fonts, supplied on ten 360K 5-1/4" PC floppy disks, contain 35 typefaces in \TeX\ format (including \TeX\ font metric (TFM) files) for 300 dots/inch laser and ink-jet printers. The fonts included are identical to the Adobe PostScript implementations of the trade names and samples shown at right. The point sizes for each typeface included are the \TeX\ sizes 5, 6, 7, 8, 9, 10, 11, 12, 14.4, 17.3, 20.7, and 24.9 points. Headline styles (equal to Times Roman, Helvetica, and Palatino, all in bold) also are included at 29.9, 35.8, 43.0, 51.6, 61.9, and 74.3 points.

TEX FOR THE 90’S

Are you still struggling with PXL’s, PK’s or GF’s?
Move on to scalable fonts:

- Save megabytes of storage—entire VTEx fits on one floppy.
- Instantly generate any font in any size and in any variation from 5 to 100 points.
- Standard font effects include compression, slant, smallcaps, outline, shading and shadow.
- New: landscape.
- Discover the universe of MicroPress Font Library professional typefaces: not available from any other TeX vendor.

List price $399 Introductory offer $299

Includes the VTEx typesetter (superset of TeX), 10 scalable typefaces, VVIEW (arbitrary magnification on EGA, CGA, VGA, Hercules, AT&T), VLASER (HP Laserjet), VPOST (PostScript), VDOT (Epson, Panasonic, NEC, Toshiba, Proprinter, Star, DeskJet) and manuals.

Introductory offer expires on September 1, 1990. S/H add $5. COD add $5. WordPerfect Interface add $100. Site licenses available. Dealers’ inquiries welcome. Professional typefaces available for older implementations of TeX.

A Gentle Introduction to \TeX

A Manual for Self-study by Michael Doob

A Gentle Introduction to \TeX\ is perfect for the beginning \TeX\ user.

Easy-to-follow and straightforward, this 89 page, softbound manual reveals the basics behind \TeX\ typesetting:

- characters and words
- paragraphs and pages
- mathematics
- simple tables
- simple macros

...with dozens of helpful examples and solutions in 11 friendly chapters.
