Abstract
In this paper we will present several \TeX\ innovations, conceived, or currently under development, at ILJ (the Louis-Jean printing house). ILJ was founded in 1804, at Gap (Southern French Alps) and employs 130 people. Due to its specialization in typesetting and printing of scientific books, ILJ has been using \TeX\ since the late eighties. Currently about 30\% of ILJ’s book production is done with \TeX\. New developments in the \TeX\ area sponsored or financed by ILJ are described in this paper.

This paper will be published in the next issue of TUGboat.
