NAME
extconv – convert a TeX document in either Big 5+ or GBK encoding into ‘preprocessed’ form.

SYNOPSIS
extconv < infile > outfile

DESCRIPTION
Big 5+ and GBK encodings use the characters {, }, and \ which have special meanings in TeX documents.

After processing a \LaTeX document which contains such characters with extconv you need not care about these special characters.

This filter is part of the CJK macro package for \LaTeX.

SEE ALSO
bg5conv(1), sjisconv(1), cefconv(1), cef5conv(1), cefsconv(1), the CJK documentation files.
