I. Introduction

This is an introduction. This is an introduction. This is an introduction. This is an introduction. This is an introduction. This is an introduction. This is an introduction. Footnotes should appear at the end of the page in which they are inserted.\footnote{\textsuperscript{1}} ‘Single quotation marks’ can be conveniently inserted using the ‘csquotes’ package: add the lines

\usepackage{csquotes}
\MakeInnerQuote{"}

to the preamble of your \LaTeX file and use the inch symbol (") for quotation marks.\footnote{\textsuperscript{2}} Collect tables and figures at the end of the manuscript (see figure 1 and table 1).

II. Manuscript Formatting

Instructions to authors including formatting guidelines are available at http://www.tandf.co.uk/journals/journal.asp?issn=0003-6846&linktype=44. All references used as examples in these guidelines are shown in this document to demonstrate that the Bib\TeX style of ‘Applied Economics’ complies with these guidelines. Please report any problems at http://sourceforge.net/projects/economtex/.

III. Citations

Citations in Text

\footnote{This is a footnote. This is a footnote. This is a footnote. This is a footnote. This is a footnote. This is a footnote. This is a footnote. This is a footnote. This is a footnote. This is a footnote. This is a footnote. This is a footnote. This is a footnote.
\footnote{Of course, you can also define another symbol in the command \texttt{\MakeInnerQuote}, e.g. the degree sign (°).}
Citations in Parenthesis

A equals B (Smith, 1972), B equals C (Brown and Jones, 2005), C equals D (Smith et al., 1972a), and D equals A (Smith et al., 1972b). Hence, A, B, C, and D are all equal (Smith, 1972; Brown and Jones, 2005; Smith et al., 1972a,b).

Citations with Page Numbers

IV. Equations

There are no instructions regarding equations.

\[ y = a + Xb \] (1)

where \( a \) is a scalar, \( y \) and \( b \) are vectors, and \( X \) is a matrix. Of course, you can also use Greek symbols.

\[ \theta = \alpha + \Psi \beta \] (2)

where \( \alpha \) is a scalar, \( \theta \) and \( \beta \) are vectors, and \( \Psi \) is a matrix.
