The `authortitle-comp` style

This style is a compact version of the `authortitle` style which prints the author only once if subsequent references passed to a single citation command share the same author. This style will implicitly enable the `sortcites` package option at load time.

Additional package options

The `dashed` option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option `dashed`. Setting `dashed=false` in the preamble will disable this feature. The default setting is `dashed=true`.

Multiple citations

Aristotle, *Physics* | *Poetics* | *Rhetoric* | Averroes, *Possibility of Conjunction*
