DESCRIPTION
\texttt{kpsetool} is a Bourne shell script that makes a \TeX-style \texttt{kpsetool}, \texttt{kpsexpand}, and \texttt{kpsepath} available. \texttt{kpsetool} uses \texttt{web2c}´s (new) \texttt{kpsexpand} binary, so the syntax for \texttt{kpsexpand} is incompatible with \TeX´s as of version 0.4.
