NAME
t1lint – check a PostScript Type 1 font for correctness

SYNOPSIS
t1lint font [font...]

DESCRIPTION
T1lint checks PostScript Type 1 font programs for correctness. Any errors or variances from the
specification are reported to standard error. If there are no errors, the command prints nothing. It
exits with status 0 if all fonts were OK, and status 1 otherwise. If no input files are supplied,
t1lint reads a font from the standard input.

OPTIONS
-quiet
Do not generate any error messages. The only output will be the exit status.
-help
Print usage information and exit.
-version
Print the version number and some short non-warranty information and exit.
