Entering CindyScript Code

The CindyScript Editor

To enter CindyScript one can use the editor that is available from the menu Scripting/Edit Scripts. Here we explain briefly how to use the editor.

The Input Window

The Script Editor

The script editor shows a three pane view. On the left you see an overview over all occasions (see below) and the associated scripts. On the right you see, below a panel that features a start, stop and help button as well as a field to enter script names, a large text area which is used to edit (i.e., type) scripts, and a smaller text area.
