The *authortitle-comp* style

This style is a compact version of the *authortitle* style which prints the author only once if subsequent references passed to a single citation command share the same author. This style will implicitly enable the *sortcites* package option at load time.

**Additional package options**

The *dashed* option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option *dashed*. Setting *dashed=false* in the preamble will disable this feature. The default setting is *dashed=true*.

**Multiple citations**

Aristotle, *Physics*, *Poetics*, *Rhetoric*; Averroes, *Possibility of Conjunction*
