Chapter 1

Support Vector Machines

The SVM\(^1\) is used widely in the area of pattern recognition. SVMs are ... (but beware, converting the initial letter to upper case for a small caps acronym is sometimes considered poor style).

Short version: SVM. Long version: support vector machine. Full version: SVM (support vector machine). Description: Statistical pattern recognition technique [1].

This is the entry in uppercase: SVM.

---

\(^1\)support vector machine: Statistical pattern recognition technique [1]
Chapter 2

Kernel Support Vector Machines

The \texttt{ksvm}\textsuperscript{1} is an \texttt{svm} that uses the so called “kernel trick”. This is the entry’s description without a link: Statistical pattern recognition technique using the “kernel trick”.

(Reset all.) Possessive: \texttt{ksvm’s}\textsuperscript{2}. Make the glossary entry number bold for this one \texttt{svm}\textsuperscript{3}.

\textsuperscript{1}kernel support vector machine: Statistical pattern recognition technique using the “kernel trick”\textsuperscript{2}kernel support vector machine: Statistical pattern recognition technique using the “kernel trick”\textsuperscript{3}support vector machine: Statistical pattern recognition technique [1]
