A Radboud University titlepage

Mart Lubbers

2019/05/09

1 Introduction

rutitlepage is an unofficial \LaTeX{} package to generate titlepages for Radboud University. It uses official vector logos by the university. The package depends on geometry, graphicx, ifpdf, keyval and iflang. The logo changes when babel-dutch is loaded; this package does not depend on it.

1.1 Contributors

rutitlepage is maintained by Mart Lubbers but work has been done by (in order of date of contribution):

- Camil Staps\textsuperscript{1}
- Daan Sprenkels\textsuperscript{2}
- Chris Kamphuis\textsuperscript{3}

Previously, this titlepage flew around on the university for at least several years in many forms. I’m not sure who created it first but credits to them!

2 Usage

\maketitle

This macro creates the actual titlepage. It has several options that can be passed in a keyval manner (see the examples below). All options are optional. The available options are:

\footnotesize
\begin{itemize}
\item \textsuperscript{1}https://github.com/camilstaps
\item \textsuperscript{2}https://github.com/dsprenkels
\item \textsuperscript{3}https://github.com/chriskamphuis
\end{itemize}
<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
<th>Layouts</th>
<th>Default</th>
</tr>
</thead>
<tbody>
<tr>
<td>authors</td>
<td>The name(s) of the primary author(s).</td>
<td>t, 17</td>
<td>@author</td>
</tr>
<tr>
<td>authorstext</td>
<td>A text describing the author(s).</td>
<td>t</td>
<td>Author:</td>
</tr>
<tr>
<td>colour</td>
<td>Gives the logo colours. No value needed.</td>
<td>17</td>
<td></td>
</tr>
<tr>
<td>course</td>
<td>The name of the course.</td>
<td>t</td>
<td></td>
</tr>
<tr>
<td>date</td>
<td>The date.</td>
<td>t, 17</td>
<td>@date</td>
</tr>
<tr>
<td>institution</td>
<td>The institution the document was written at.</td>
<td>t</td>
<td>Radboud University Nijmegen(^5)</td>
</tr>
<tr>
<td>layout</td>
<td>The layout: traditional or seventeen. See the examples below.</td>
<td>t, 17</td>
<td>seventeen</td>
</tr>
<tr>
<td>nextpagenr</td>
<td>The page number of the next page.</td>
<td>t, 17</td>
<td>\thepage+1</td>
</tr>
<tr>
<td>others</td>
<td>Groups of other important people, besides the author(s).</td>
<td>t, 17</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The syntax is: {Header}{Names}. For more than one group, use: {{...}{{...}{{...}}}.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>subtitle</td>
<td>The italic text under the title.</td>
<td>t, 17</td>
<td>@title</td>
</tr>
<tr>
<td>title</td>
<td>The main document title.</td>
<td>t, 17</td>
<td></td>
</tr>
</tbody>
</table>

### 3 Examples

The following code generates the two titlepages below:

\maketitleru[
  authors=\{John Doe\},
  date=\{Tomorrow\},
  others=\{\{Supervisor:\}\{Jane Doe\},\{Second reader:\}\{Joanne Dune\}\},
  course=\{Master's Thesis\},
  title=\{The 'traditional' layout\},
  subtitle=\{Simple elegance\}]

\maketitleru[
  layout=seventeen,
  authors=\{John Doe\},
  date=\{Tomorrow\},
  others=\{\{Supervisor:\}\{Jane Doe\},\{Second reader:\}\{Joanne Dune\}\},
  title=\{The 'seventeen' layout\},
  subtitle=\{Based on the latest corporate identity guidelines\}]

---

\(^4\)Describes in which layouts the key is applicable. t stands for ‘traditional’; 17 for ‘seventeen’. See the layout option and the examples below.

\(^5\)When babel-dutch is loaded, ‘Radboud Universiteit Nijmegen’.
The ‘seventeen’ layout

*Based on the latest corporate identity guidelines*

**JOHN DOE**

Tomorrow

 Supervisor:
 Jane Doe

Second reader:
 Joanne Dune
