NAME
fc-list − list available fonts

SYNOPSIS
fc-list [ -vVh ] [ --verbose ] [ [ [-f format ] [ --format format ] ] [ [ -q ] [ --quiet ] ] [ --version ] [ --help ]

[ pattern [ element... ] ]

DESCRIPTION
fc-list lists fonts and styles available on the system for applications using fontconfig. If any elements are
specified, only those are printed. Otherwise family and style are printed, unless verbose output is
requested.

OPTIONS
This program follows the usual GNU command line syntax, with long options starting with two dashes ('-'). A summary of options is included below.
-v Print verbose output of the whole font pattern for each match, or elements if any is provided.
-f Format output according to the format specifier format.
-q Suppress all normal output. returns 1 as the error code if no fonts matched.
-V Show version of the program and exit.
-h Show summary of options.

pattern If this argument is set, only fonts matching pattern are displayed.

element If set, the element property is displayed for matching fonts.

EXAMPLES
fc-list Lists all font faces.
fc-list :lang=hi Lists font faces that cover Hindi.

fc-list : family style file spacing
Lists the filename and spacing value for each font face. ‘:’ is an empty pattern that matches all
fonts.
