A true beginner looks at \LaTeX

Peter L. Flom

April 25, 2005

Abstract

This presentation, based on an article to be published in Prac\TeX
group, will look at the good (and bad) points of learning \LaTeX from
the point of view of a new user who is not a programmer. It will in-
clude suggestions for the \LaTeX experts who write for beginners, and for
beginners themselves.
