Font definition option \texttt{cmmib57.sty}

American Mathematical Society

3.00, 2009/06/22

1 Introduction

This file used to contain alternate font definition statements for use with an earlier set of Type 1 fonts that did not have 6, 8 or 9pt design sizes. It is now obsolete. (See the discussion of the \texttt{psamsfonts} option in the \texttt{amsfonts} package documentation.)

Package info:

1 \texttt{\NeedsTeXFormat{LaTeX2e}}% LaTeX 2.09 can't be used (nor non-LaTeX)
2 \[1994/12/01\]% LaTeX date must be December 1994 or later
3 \texttt{\ProvidesPackage{cmmib57}[2009/06/22 \texttt{v3.00} %}
4 *obsolete* alternate cmmib, cmbsy font definitions]
5 \texttt{\PackageWarningNoLine{cmmib57}{This package is obsolete with AMSfonts v3}}

The usual \texttt{\endinput} to ensure that random garbage at the end of the file doesn't get copied by \texttt{docstrip}.
6 \texttt{\endinput}

Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in roman refer to the code lines where the entry is used.
