The \texttt{authortitle-ibid} style

This citation style is a variant of the \texttt{authortitle} style. Immediately repeated citations are replaced by the abbreviation ‘ibidem’ unless the citation is the first one on the current page or double page spread (depending on the setting of the \texttt{pagetracker} package option). This style is intended for citations given in footnotes.

Additional package options

The \texttt{ibidpage} option

The scholarly abbreviation \textit{ibidem} is sometimes taken to mean both ‘same author + same title’ and ‘same author + same title + same page’ in traditional citation schemes. By default, this is not the case with this style because it may lead to ambiguous citations. With \texttt{ibidpage=true} a page range postnote will be suppressed in an \textit{ibidem} citation if the last citation was to the same page range. With \texttt{ibidpage=false} the postnote is not omitted. Citations to different page ranges than the previous always produce the page ranges with either setting. The default setting is \texttt{ibidpage=false}.

Consider the following example citations

\begin{verbatim}
\cite[12]{cicero}
\cite[12]{cicero}
\cite[12]{worman}
\cite[13]{worman}
\end{verbatim}

If \texttt{ibidpage} is set to \texttt{true}, the citations come out as

\begin{itemize}
\item Cicero, \textit{De natura deorum}, p. 12
\item ibid.
\item Worman, \textit{The Cast of Character}, p. 12
\item ibid., p. 13
\end{itemize}

The result for \texttt{ibidpage=false} is

\begin{itemize}
\item Cicero, \textit{De natura deorum}, p. 12
\item ibid., p. 12
\item Worman, \textit{The Cast of Character}, p. 12
\item ibid., p. 13
\end{itemize}

The \texttt{dashed} option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option \texttt{dashed}. Setting \texttt{dashed=false} in the preamble will disable this feature. The default setting is \texttt{dashed=true}.
Hints
If you want terms such as *ibidem* to be printed in italics, redefine \texttt{\textbackslash mkibid} as follows:

\texttt{\renewcommand*{\textbackslash mkibid}{\textbackslash emph}}

\texttt{\footcite examples}
This is just filler text.\footnote{Aristotle, *Rhetoric*} This is just filler text.\footnote{Ibid.}
