1.4 Topic (Thema)
Intelligentes Schreiben von Anträgen

1.5 Report and Funding Period (Berichts- und Förderzeitraum)

1.6 Research area and field of work (Fachgebiet und Arbeitsrichtung)
Scientific discipline: Computer Science
Fields of work: Knowledge Management

1.7 Application Areas (Verwertungsfelder)
Knowledge Management, Document Management, Workflow Systems
2 Final Progress ReportArbeits- & Ergebnisbericht

This is what the reviewers read (maximum 10 pages of A4)

- Projects initial questions and objectives.
- Project developments — including deviations from the original plan, failures, and problems encountered with project organisation or technical execution.
- Presentation of results and discussion of the relevant research situation in this context, potential perspectives for application, and conceivable follow-up research.
- Statement on whether the results of the project are economically valuable and whether exploitation is already taking place or may be anticipated; if applicable, details regarding patents, industrial joint ventures, etc.
- Who has contributed to the results achieved by the project (national/international partners, project staff, etc.)?
- Qualification of young researchers in the context of your project (for example, first degree, doctorate, post-doctorate, etc.).

The report must be understandable without the need to consult additional literature. To illustrate and enhance your presentation you may refer to your own and others publications. Make it clear whenever you are referring to other researchers work and explain your own papers. Please list all cited publications at the end of the section. This reference list is not considered your list of publications. Any unpublished work must be included with the final report. However, note that reviewers are not required to read any of the works you cite. Reviews will be based only on the text of the actual report.

\(^{1}\)To Do: from the report template
3 Final Progress ReportArbeits- & Ergebnisbericht

This is for the DFG web site and report, made available to the general public (maximum 1 page of A4)

- Presentation, in clearly understandable, everyday language of the key scientific findings and any potential applications.
- Any surprises encountered in the course of the project and in the results obtained.
- Reference to any articles published in the media reporting the success of the project. Projects initial questions and objectives.
