The \texttt{sttools} collection

Sigita\v{s} Tolui\v{s}is
sigitas@vtex.lt
2016.06.28

1 Introduction

This is collection of various packages historically placed in a bundle and maintained by Sigitas Tolui\v{s}is.

2 Usage

- \texttt{cuted.sty}, v1.5 2012/10/04 – place some material page width wide at any place on two-column page with existing text reformatted under inserted material;
  \texttt{TODO}: add optional rules to separate from text;
- \texttt{floatpag.sty}, v1.1 2012/05/29 – set page style for floats page;
- \texttt{flushend.sty}, v3.2 2016/06/21 – balance page in two-column mode;
  (2014/03/03): totally rewritten with new algorithm to support footnotes, top floats and column break before one line section title.
  (2014/04/24): bugfix version;
  (2015/03/27): bugfix version with improved functionality:
  - spreaded or fixed right column height;
  - optional old algorithm for backward compatability;
  (2015/04/14): set debug option off by default; keeplastbox modified;
  (2016/06/21): bugfix compatibility with luatexja package;
- \texttt{midfloat.sty}, v1.1 2012/05/29 – insert one-column stuff in two-column page;
  \texttt{TODO}: extend to work on both columns;
- \texttt{stabular.sty}, v2.0 2014/03/20 – use modified tabular environment;
  (2014/03/20): removed extra stuff and left only possibility to break on page boundary;
  added tabular variant from array package;
- \texttt{stfloats.sty}, v3.2 2016/06/28 – enable enriched floats output mechanism;
  (2016/06/28): compatibility bugfix with 2015 latexrelease;
• **texsort.sty, v1.1 2012/05/29** – sort numerical values;
  TODO: extend (rewrite) to support alphanumerical values for sorting.

  Just load any of the provided packages in the standard way: `\usepackage{⟨package⟩}`
or `\RequirePackage{⟨package⟩}`.

  To read documentation: `texdoc ⟨package⟩`.
