NAME
bg5conv – convert a TeX document in Big 5 encoding into ‘preprocessed’ form.

SYNOPSIS
bg5conv < infile > outfile

DESCRIPTION
Big 5 encoding for traditional Chinese uses the characters {, }, and \ which have special meanings in \TeX documents.

After processing a \LaTeX\ document which contains Big 5 characters with \texttt{bg5conv} you need not care about these special characters.

This filter is part of the CJK macro package for \LaTeX.
