NAME
  sjisconv – convert a TeX document in SJIS encoding into ‘preprocessed’ form.

SYNOPSIS
  sjisconv < infile > outfile

DESCRIPTION
  SJIS encoding for Japanese uses the characters {, }, and \ which have special meanings in TeX documents.

  After processing a \LaTeX\ document which contains SJIS characters with sjisconv you need not care about these special characters.

  This filter is part of the CJK macro package for \LaTeX\.

SEE ALSO
  bg5conv(1), cefconv(1), cef5conv(1), cefsconv(1), extconv(1), the CJK documentation files.
